

# BERTL'S BEST 2008

13th Annual Awards

## **Most Secure MFP Range**

.....

**Sharp**   
**Sharp MFP Range**

- **Sharp MFPs can limit unauthorized access to each device by utilizing account codes, user/group profiles, passwords, external user accounts or access cards**
- **Incoming faxes can be routed to an email address or a locked network folder, providing a secure incoming path for fax enabled Sharp MFP devices**
- **Network access is well protected with MAC and IP filtering Protocol and Port Disabling, taking MFP security well beyond most competing units**
- **Optional Data Security Kit (DSK) for added hard drive security — Sharp continues to maintain the highest level of “Common Criteria” validation (the global standard for information technology security evaluations)**
- **Data encryption ensures that jobs in transit, stored or in RAM or hard drive are secure**
- **Integration with document management specialist Doculex ensures that communications remain secure through their entire life cycle**
- **Many network authentication options, including Kerberos, IPSEC and SSL (Secure Socket Layer), allow access to Sharp MFPs to be tightly controlled and monitored**
